Innovation Center**

**AAON
45 TON**

45 ton Water-Source Heat Pump Rooftop Unit being moved into a 50 ton Over/Under Psychrometric Test Chamber for Performance Testing and Verification

Verified performance provides assurance that your building's HVAC equipment will perform as specified. The Norman Asbjornson Innovation Center is the only lab in the world capable of testing thermal and acoustic performance under actual load conditions, for HVAC equipment up to 540 tons.
